

RECYCLING IN BEAR CREEK

Recycling of your trash can now be done in Bear Creek!

There are recycling bins set up in the equipment shed. The bins will be taken periodically to the recycling center in Alamosa, so we are therefore following the separation procedure used there.

There are separate bins for paper (including newspapers and magazines), clear plastic, colored plastic, milk bottles, steel cans, and aluminum cans. We are not accepting glass items.

We will set up a separate system later for accepting large cardboard boxes.

Let's make this recycling project a success by respecting these rules –

- 1. Rinse food containers before depositing them in the bins**
- 2. Crush milk jugs to save space**
- 3. No phone directories in paper bin**
- 4. Deposit flat cardboard in roll-off dumpster**

Thanks for your cooperation!
